Job Description

Revision date: Oct 2026

Sustainability 2iC Left Over Love Lead

Job Purpose

For the past 5 years or so we have run Left Over Love - our post festival food drive. This involves collecting and donating leftover non-perishable food from our Burners to the local communities in Hunterville. Every year the food banks we donate to are incredibly grateful and happy to receive our goods and we are looking for a lead to drive a crew of people to make this happen again in 2027.

Key duties/responsibilities

- Work with the Sustainability Lead to recruit, onboard, roster and support a pool of volunteers to collect, count and deliver left over food to the Hunterville community.
- Ideally you or someone in your team will have a car/van that you can make deliveries to.
- Make sure the Left Over Love team has all the information they need before the burn to come prepared.
- Run on-site inductions, instructions, introductions and H&S.
- Support the Sustainability Lead to input into the Afterburn report.
- Liaise with the Depot and theme camps to create drop off locations and collection points for left over food.
- Set up drop off zones at the gate to collect food from people as they are leaving, whilst keeping the flow of traffic going.
- Organise communications to our community to encourage people to drop off their left over food.

Working Relationships

You are likely to work with the following people/teams:

- Sustainability Lead - key point of contact
- KB Sustainability Team - Left Over Love Lead and Worm Farm Lead
- Theme Camp Sustainability Leads (Green Leads)
- Traffic and Gate Leads
- You might also reach out within and beyond the Kiwiburn crew for questions, e.g. Infrastructure Lead, Theme Camp Lead, etc.

Time Commitment

- ***Year round:*** 1-3 hours per week
- ***On site:*** TBC we may want to run events on site, or have a celebrational hang

Qualities, Knowledge and Experience

We seek people possessing SOME of the qualities below to create a multi talented team. If you think you have something special to offer that does not appear below, please get in touch!

- Planning skills: you can break down a large task in small, actionable tasks that teams can work on, logistics and coordination of activities on site.
- Team management, people organisation and bringing the vibes! Getting people the right information before they arrive on site and keeping everyone organised and ready to go.
- Get sh*t done skills: facilitating conversations, assessing options, prioritising, action planning, execution, etc
- Collaboration skills: active listening, ability to empathise, good verbal communication
- Keen interest in sustainability, and solution-oriented. Are able to think outside the box
- Good understanding of Kiwiburn and worldwide Burner culture
- Knowledge of local initiatives (community garden, waste system, etc)
- A passion for sustainability; do you walk the walk?
- Competent with, or willing to learn, the software and programs we use to collaborate - eg, Google Drive/Gmail, Meet and Zoom for video meetings, Slack,
